Tsukuba Journal of Mathematics
Guide for Authors (Web site)

Preparation of Papers. All papers must be in English, French or German. Preparation of the manuscript in some form of TeX such as LaTeX, AmS-TeX, and AmS-LaTeX is highly recommended.

Each manuscript is required to contain an abstract, clearly separated from the rest of the paper, which will be printed immediately after the title. In the footnote of the first page, the following information should be given: AMS subject classifications, key words and phrases. The affiliation(s) of the author(s) should be given at the end of the paper.

Formulas in the text should be written with the solidus or negative exponent; for example, a/b instead of $\dfrac{a}{b}$ and $(2a)^{-1}$ or $1/(2a)$ instead of $\dfrac{1}{2a}$. Also $\sum_{i=1}^{n} a_i$ and $\prod_{i=1}^{n} a_i$ should be used instead of $\sum_{i=1}^{n} a_i$ and $\prod_{i=1}^{n} a_i$, respectively in the text.

References should be listed alphabetically in the following style:

[1] Cartan, H. and Eilenberg, S., Homological Algebra, Princeton, 1956.

[2] Serre, J. P., Faisceaux algebriques coherents, Ann. Math. 61 (1965), 197-278.

Submission of Papers.

1. Electronic Submission: A PDF file of the manuscript can be submitted by e-mail to the Editorial Office : journal@math.tsukuba.ac.jp. If accepted for publication, the source file of the manuscript also should be sent to the Editorial Office.

2. Non-Electronic Submission: Papers to be submitted for publication should be sent to the chair of the editorial committee. The original manuscript should be submitted in duplicate. Copies of unpublished- or not-easily-accessible-papers of the author(s) cited in the manuscript should be submitted with the manuscript.

Offprint policy. From vol.40, free 100 hard-copy reprints of the published articles will not be delivered. Instead each corresponding author receives the PDF file of the article. Hard-copy reprints, minimum 10 copies, are provided upon the request and at the expense of the author. The charge for hard-copy reprints depends on the manuscript pages.
